About Me

Data Scientist skilled in data analytics, machine learning, and computer vision. Experienced in transforming raw and multi-source data into reliable analysis, reports, dashboards, and actionable insights for business and operational decision-making. Comfortable working with cross-functional teams to understand business problems, communicate findings clearly, and support data-driven decisions.

Education

Bachelor of Data Science

Telkom University. GPA: 3.62/4.0 (August 2021 – August 2025)

Course related: Big Data Infrastructure and Technology, Machine Learning, Cloud Computing, Database Management, Data Analytics, Statistics, Data Science for Industry, Project Management

Data Analytics and Software Development MSIB Kampus Merdeka Batch 6

RevoU Tech Academy. Grade: 98/100 (February 2024 – June 2024)

Course related: Data Analytics, Software Development

Skills

Soft Skills:

Analytical & Critical Thinking, Problem Solving, Communication, Data Storytelling, Team Collaboration

Technical Skills:

- **Data Analysis**: SQL, Python, Pandas, NumPy, Statistical Analysis, Exploratory Data Analysis (EDA), Data Wrangling, Data Validation, Feature Engineering
- **Data Engineering & Databases**: ETL, Data Transformation, MySQL, BigQuery, Google Cloud Platform
- **Visualization & Business Intelligence**: Tableau, Google Looker Studio, Matplotlib, Plotly, Streamlit, Dashboard Development, KPI Reporting
- **Databases & Cloud**: MySQL, BigQuery, Google Cloud Platform, Microsoft Azure,
- **Additional**: Data Storytelling, Business Analysis, Cross-functional Collaboration, UI/UX & Graphic Design

Experience

Transjakarta

Data Scientist (October 2025 – Present)

- Extracted, cleaned, transformed, and analyzed large-scale operational, transactional, and ERP data using SQL and Python to support business, operational, and audit analysis.
- Performed exploratory and ad-hoc analysis to identify data patterns, anomalies, operational issues, and potential areas for improvement across multiple departments.
- Developed and maintained interactive dashboards and KPI reports to monitor audit follow-up across 30+ departments.
- Built automated data processing and monitoring workflows to reduce manual reporting and improve the consistency and accessibility of analytical information.

- Worked with cross-functional stakeholders to understand business processes, translate business questions into analytical requirements, and communicate findings through reports, dashboards, and data visualizations.
- Developed an internal semantic search solution to help business users retrieve information from company regulations and internal documents.

Midblock

Data Analyst (Internship) (March 2025 – August 2025)

- Built ETL pipelines to collect and transform football data from APIs into BigQuery, preparing structured datasets for analysis and reporting.
- Cleaned, transformed, and validated player, team, and match datasets to ensure data quality and consistency.
- Conducted player and team performance analysis using Python and SQL to identify trends and performance patterns.
- Developed data visualizations and scouting reports to communicate analytical findings to business and football stakeholders.
- Supported analytical projects by combining data from multiple sources and translating raw datasets into actionable insights.

Big Data Laboratory Telkom University

Member (September 2024 – June 2025)

- Studied data processing, database, and AI technologies through practical projects.
- Contributed to the development of an AI-powered chatbot for a money changer business by working with business requirements and data.

Badan Riset dan Inovasi Nasional Republik Indonesia (BRIN RI)

Data Scientist Researcher (Internship) (July 2024 – September 2024)

- Collected, cleaned, and organized research datasets from journal publications for NLP research.
- Developed Python-based tools for data collection, preprocessing, and dataset management.
- Performed data annotation and validation to improve dataset quality and consistency.
- Applied Natural Language Processing techniques to structure and analyze unstructured research data.

Himpunan Mahasiswa Data Science Telkom University

Mentor Data Visualization and Staff of Communication and Information (May 2023 – June 2024)

- Taught data visualization concepts and practical techniques to undergraduate Data Science students.
- Created data-driven visual content and communication materials for organizational social media.

Projects

A selection of my work in data science and analytics. All projects can be accessed here.

Achievements

- **Author and Presenter – International Seminar on Application for Technology of Information and Communication (iSemantic 2025).** Published a peer-reviewed research paper in IEEE Xplore on the comparative performance of YOLOv10, YOLOv11, and YOLOv12 for helmet violation detection, and presented the research at the international conference. [LINK]
- **Top 4 Finalist** – National Infographic Competition 2024 *(Dataquest – Data Science Competition, Universitas Airlangga)*

Licenses & Certifications

Data Analytics and Software Development

RevoU Tech Academy (July 2024)

Intermediate Python

DataCamp (July 2023)
